

I have been an xm customer for over a year, and I have to say it has been one of the best investments I have ever made. I am a professional truck driver and drive cross country. The xm radio is beneficial to me and my partner for numerous reasons, we team drive, so the truck is pretty much on the move 24 hrs a day. It give us something to listen too continuously without having to worry about loosing the station. We are also able to keep up with current events via the news stations, and also we are able to learn of weather conditions and road conditions for numerous cities in the country. Recently is was extremely helpful as we were traveling through the Dallas/Ft. Worth area and just knowing that there were no tornado warnings allowed us to keep moving without having to go to local channels and wait until they decided to update the weather. The xm radio has been a blessing for us. Please reject the petition 04-160. XM radio is doing a great service that entertains and assists millions of people, it is a great thing that should not be messed with.
